

2014 Community Benefit Report

*Caring People,
Caring for the Community*

LEE MEMORIAL
HEALTH SYSTEM

Devoted to Excellence in Health Care

We are **Caring People, Caring for Our Community**

Lee Memorial Health System has a long history of providing safe, high quality, leading-edge and compassionate care.

From one hospital—Lee Memorial Hospital—in 1916, we now encompass four acute care hospitals, two specialty hospitals and comprehensive health care services in facilities and office locations throughout Southwest Florida. Our team also has grown from two nurses to more than 11,500 employees, 1,300 community physicians and 4,500 volunteers and auxiliaries—your family members, neighbors and friends who make up your community health system.

With more than 1 million patient contacts each year, Lee Memorial Health System is the fourth largest public health system in the United States and one of the largest in Florida. We serve all patients regardless of their financial or insurance status, and we do all of this without the benefit of direct local community tax support.

In 2014, our total Community Benefit is valued at \$285 million. We are able to fulfill our mission of meeting the health care needs and improving the health status of Southwest Florida by focusing on comprehensive, efficient and compassionate care delivery and by leveraging partnerships with a variety of important community organizations.

This 2014 community reports offers you a glimpse into some of the leading-edge services and programs that Lee Memorial Health System offers, and it highlights the ways we collaborate with our

partners to serve our community. It also shows for the first time in more than a decade a slight decline in the cost of charity care and the cost of unpaid Medicaid, which can be attributed to the improved economy, the implementation of the Affordable Care Act—and more people signing up for insurance—as well as our internal process improvements.

Every person on our team is vital to our success, and we wouldn't be able to do what we do every day and night without their dedication to our mission and their devotion to excellent health care delivery. We are extremely proud of what we have accomplished through the years and look forward to continuing to competently and compassionately serve our community as caring people, caring for people.

Sanford Cohen, M.D.
Chairman, Board of Directors
Lee Memorial Health System

Jim Nathan
President
Lee Memorial Health System

Annual Statement of Community Benefits by Hospital and System—2014

	Lee Memorial Health System	Lee Memorial Hospital	HealthPark Medical Center	Cape Coral Hospital	Gulf Coast Medical Center
Cost of Charity Care for Low-Income Patients	\$46,929,194	\$17,271,998	\$9,362,571	\$9,998,777	\$10,295,849

Net Value of the 2014 Community Benefits	\$229,070,900	\$58,660,444	\$61,665,859	\$45,583,074	\$63,161,523

Research Benefits the Community

Lee Memorial Health System is devoted to treating patients today and in the future. Part of the future vision involves research into new technologies and cures for diseases and conditions that affect our local and global population.

Our pediatric oncology physicians and nurses are engaged in ongoing trials and studies that aim to reduce the number of children who get cancer and find cures and advanced treatments for those who are fighting the disease. A full-time position, not related to cancer, is devoted to supporting research projects. An Institutional Review Committee, which includes clinical representatives throughout the system, participated in more than 150 research projects in 2014.

American Heart Association

Lee Memorial Health System supports the American Heart Association efforts through a number of programs and initiatives, including the annual Heart Ball, Wear Red Day, National Walking Day, My Heart My Life—a comprehensive platform for healthy lifestyles; and through ongoing community programs aimed at reducing the number of deaths from heart disease by 20% by 2020. This partnership includes a focus on workplace wellness through the Fit-Friendly Employer designation. More than 40 employers in Southwest Florida, including

Lee Memorial Health System employees celebrate annual Wear Red Day at HealthPark Medical Center to raise awareness of heart disease.

Lee Memorial Health System, have achieved gold and platinum status for workplace wellness, with more businesses scheduled to sign on to the program in the next year.

Other Nonprofit Partners

Members of our senior leadership and staff volunteer their time and talents to local nonprofit organizations, including:

- | | |
|-----------------------------------|----------------------------|
| Healthy Lee | Chambers of Commerce |
| Foundation for Lee County Schools | United Way |
| Harry Chapin Food Bank | Bob Janes Triage |
| Hodges University | American Heart Association |
| Horizon Council | March of Dimes |
| | YMCA |

This donated time translates into a healthier community and keeps Lee Memorial Health System employees in touch with the heart of Southwest Florida.

Healthy Lee: Collaborating for Community Health

Healthy Lee began in 2007 when Lee Memorial Health System recruited and convened 38 community leaders to help improve the health of our residents and health care delivery in Lee County. Originally known as Community Health Visioning 2017, this group engaged 4,000 residents in surveys, focus groups and town hall meetings to establish priorities for improving our community's health.

When our 2011 Community Health Needs Assessment showed that obesity was increasing and contributing to major health problems in Lee County, the group shifted the focus to healthy lifestyles and changed the name to Healthy Lee. Now, with a Steering Committee of 54 leaders and a community collaboration of grassroots organizations, Healthy Lee has a distribution list of nearly 300 active participants and organizations and a community website—www.HealthyLee.com—to support ongoing engagement with individuals, families, businesses and organizations throughout the county.

The goals of Healthy Lee are to collaborate with community partners to improve our community's health and to create a culture of healthy lifestyles for people of all ages.

Under the umbrella of Healthy Lee, there are a number of best practice programs that are successfully helping the residents of Lee County. Examples include:

5210

A prescription for healthy habits for children, 5210 stands for:

- **5** fruits and veggies daily
- No more than **2** hours of screen time per day
- At least **1** hour of physical activity every day
- **0** sugary beverages

This blueprint for healthy habits is available for parents and families through local pediatricians' offices, schools and day cares. More information is available at www.HealthyLee.com and also through local pediatrician offices.

It's All About You

This free, six-week, research-based chronic disease management program was developed by Kate Lorig, Ph.D., from Stanford University. It's All About You empowers patients and helps improve health, well-being and self-confidence by focusing on decision-making, action-planning/goal-setting and problem-solving. The program—which is open to anyone 18 years of age or older who is living with a chronic health condition—is offered through Lee Memorial Health System's Lee Health Solutions, in partnership with local community agencies and businesses and supported in part by a grant from the Southwest Florida Community Foundation.

Bob Janes Triage Center

The Bob Janes Triage Center & Low Demand Shelter provides an alternative to incarceration for low level or nonviolent offences or inappropriate emergency department utilization for people with addictions or mental illness who otherwise would face jail time and no treatment. The Triage Center is staffed by The Salvation Army with support from medical and behavioral health professionals on the campus of SalusCare. Lee Memorial Health System provides financial support. In 2014, the center served 563 unduplicated people. Since the center opened in 2008, it has enabled a 46 percent reduction in arrests for low level offenders with mental health needs. The center was recognized with the 2014 National Hospital Charitable Service Award from Jackson Healthcare and the first Unite Award from Myers, Brettholz & Company, PA on behalf of the United Way and the Southwest Florida Community Foundation.

Horizon Council Healthcare Taskforce

The Horizon Council is a public-private partnership for economic development. Among other initiatives, the council focuses on workplace wellness as an important quality of life and economic development effort. In 2014, more than 150 businesses participated in the Horizon Council Workplace Wellness Summit to learn more about implementing an effective workplace wellness program. Lee Memorial Health System plays an important role in teaching businesses how to improve their employees' health. All conference materials are available on the Healthy Lee website for continued access by the business community; and another summit is planned for 2015.

We Care

Through this partnership with community physicians, medically needy, uninsured and unemployed people in our community get the specialty medical care they need. Physicians who participate in this program donate their services. We Care is administered by The Salvation Army in partnership with the Lee County Medical Society, United Way, Family Health Centers, Southwest Florida Community Foundation and Lee Memorial Health System. In 2014, 450 physicians volunteered their time serving 244 patients. The total value of donated care was \$5.8 million, of which Lee Memorial Health System donated \$3.8 million in services.

Outreach Team

A group of more than 50 Lee Memorial Health System clinical professionals and additional community partners present health fairs, lectures and other community events to share health-related information and perform on-site health screenings, ranging from blood pressure and blood sugar to vision, balance, skin cancer and more.

In order to measure the success of Healthy Lee initiatives through changes in population health, Healthy Lee gauges the health of the community every three years through the Community Health Needs Assessment. In 2014, the study found:

- Obesity rates dropped from 29.3% to 24.8%, which is better than the national and state averages, and better than the Healthy People 2020 goal—which is a 10-year agenda to improve the nation's health
- Childhood obesity dropped from 31.6% to 20.7%
- People who meet physical activity recommendations increased from 40.9% to 50.1%
- Heart disease and stroke related deaths dropped by 29%

The entire Community Health Needs Assessment can be reviewed online at <http://LeeCounty.HealthForecast.net>

Golisano Children's Hospital of Southwest Florida Partnerships Help Us Fulfill Our Mission

Lee Memorial Health System, on behalf of Golisano Children's Hospital of Southwest Florida, provides financial support and leadership involvement to collaborating partners. Examples include:

Autism Speaks

A national organization, Autism Speaks provides a variety of valuable resources—both printed and online—for families and medical professionals. As a partner with Autism Speaks, the Golisano Children's Hospital pediatric neurology practice uses their materials to educate and support families. Additionally, in 2014, Lee Memorial Health System provided financial support for and employees participated in the organization's fundraising walk—The Southwest Florida Walk Now for Autism.

March of Dimes

Lee Memorial Health System and Golisano Children's Hospital of Southwest Florida have supported the March of Dimes' March for Babies fundraising event for more than 15 years. We also support them through collaborative research efforts and initiatives, including the initiative to eliminate early elective deliveries before 39 weeks gestation. The partnership is a natural fit, as Golisano Children's Hospital is home to the only Level III neonatal intensive care unit (NICU) between Tampa and Miami and the Regional Perinatal Intensive Care Unit.

Nova Southeastern University student nurses celebrate the Easter season with patients and staff at Golisano Children's Hospital during the annual Bunny Run.

Foundation for Lee County Public Schools

Lee Memorial Health System is an Honor Roll Summa Cum Laude sponsor of year-round foundation activities to target resources to students and teachers in the classrooms, including the STEM programming and Golden Apple Teacher Recognition Program. System leaders also sit on the foundation board to help direct those resources.

Golisano Children's Hospital of Southwest Florida Child Advocacy staff members partner with Lee County schools to provide education programs targeted to 5th graders, including Germaine the Germ Thing (hand washing) and Mission Nutrition (healthy eating habits). We also support the ArtSpeak Program for children with Autism Spectrum Disorders.

YMCAs

Golisano Children's Hospital is excited to partner with local YMCAs to bring healthy lifestyles to families through financial support, lecture series, events and free swimming lessons for those families in need. The Golisano Children's Hospital's Child Advocacy Program focuses on water safety and drowning prevention, which is why there is a special focus on swimming lessons.

Golisano Children's Hospital of Southwest Florida also provides financial support and partners with organizations—like the Harney Point Kiwanis for their KidsFest event and the Boys & Girls Club of Lee County for their Everyone Runs, Everyone Rides, Everyone Relaxes event—to bring bicycle safety, free bicycle helmets and other child advocacy initiatives to the community.

Caring for the Community

Health Professional Education

Many physicians, especially those who specialize in family practice, stay in the areas of the country where they completed their residency. By partnering with Florida State University, Lee Memorial Health System is involved in a medical residency program that aims to keep physicians in Southwest Florida.

The program currently has 13 residents, and could expand to 24 residents by 2017. "We are exploring the possibility of expanding the program as the need for more family practice physicians becomes apparent," says program director, Gary Goforth, M.D. "Part of an expansion would include other (specialty) residencies."

LEE MEMORIAL HEALTH SYSTEM
Family Medicine Program

The program, which cares for all members of the family, from infants to seniors, has been a success. Residents complete 36-month rotations in a numbers of areas, including:

- Adult medicine
- Behavioral medicine
- Pediatrics
- Obstetrics and gynecology
- General surgery
- Practice management
- Community medicine
- Geriatrics
- Sports medicine
- Emergency medicine
- Dermatology
- Ophthalmology
- Ear, nose and throat
- Urology
- Orthopedics
- Critical care
- Neurology
- Cardiology

LEE MEMORIAL HEALTH SYSTEM

The program gives residents the exposure to a cross-section of the local community, but also gives patients an opportunity to choose a physician who will be in practice for many years to come.

“The residency program has already been successful,” Dr. Goforth says. “Several of the residents have already established roots in Southwest Florida and plan to make this their permanent home. That’s the goal of the program, which benefits the community long-term.”

For more information on the residency program, visit: www.tinyurl.com/FSUresidency

In addition to the residency program, Lee Memorial Health System employees have supervised 325,577 paid staff hours of clinical experience for 1,351 students from local colleges and universities. The value of these required internship-type programs is more than \$19 million.

Areas of internships, practicums and educational programs include:

Jim Nathan, President & CEO of Lee Memorial Health System, takes the Ice Bucket Challenge to raise awareness of the local ALS Clinic in Fort Myers.

- Occupational therapy
- Physical therapy
- Physical therapy assistant
- Speech and language pathology
- Medical assistant
- Advanced registered nurse practitioner
- Licensed medical professional
- Licensed practical nurse
- Cardiovascular technician students
- Child Life interns
- Clinical education instructor
- Course for parish nurses
- ECC respiratory class
- Nursing students
- Student boot camp and self-study exam
- FGCU medical technologist student program
- FGCU mentor program
- FGCU nursing lecture - diabetes

- FGCU practicum and internship program
- FGCU training
- FGCU lab supervision
- Mentor doctor of nursing student
- Mentoring - Nova University and Sacred Heart University College of Education and Health Professions
- Master of social work student Internships
- Master of social work students and nursing students supervision
- Nova University and Florida Southwestern State College RN Education
- Nova University pharmacology I & II
- Nursing student clinical rotation –Cape Coral Institute of Technology
- Nursing student clinical rotation – FGCU
- Nursing student preceptors
- Pharmacy student rotation
- Precepting pharmacy interns
- Rehabilitation students
- Technician internship rotation - Heritage Institute and Cape Coral Institute of Technology

Lee Memorial Health System FSU Family Medicine Residency Program resident physician Elizabeth Midney, M.D., and preceptor Christina Cavanagh M.D., celebrate the program's first Match Day.

In addition to the residency program, the College of Health Professions and Social Work at Florida Gulf Coast University continues to increase programs with continued workforce shortages, including physical and occupational therapy, nursing and exercise science. The Doctor of Nursing Practice degree has been approved, and will replace the current Master of Science in Nursing with Primary Nurse Practitioner program.

At Florida Southwestern State College, opportunities to increase advancement activity for funding student scholarships and endowed chair/faculty positions exist, as well as maximizing class sizes in the nursing programs. Florida Southwestern is seeking to create more college credit certificates that are part of their current associate degree offerings.

Lee Community Healthcare, Inc.

The Lee Physician Group United Way House clinics, which serve a diverse population, expanded in 2014. The locations in Dunbar, North Fort

Lee Community Healthcare-North Fort Myers Clinic

Myers and Cape Coral added new medical providers and support staff to meet an 11% increase in patient visits. Those clinics cared for 6,693 patients during 16,064 office visits, one-third of who would have otherwise gone to a Lee Memorial Health System emergency department to receive care for non-emergency conditions.

Use of the clinics avoided \$1.4 million in unnecessary and inappropriate use of the emergency departments. In addition, the clinics helped patients manage chronic illnesses. In addition to reducing emergency department visits, the clinics helped patients manage chronic illnesses, resulting in a better quality of life. The 1,123 patients diagnosed with hypertension noted a decline in their blood pressure. Of those patients, 730 (65%) significantly reduced or ceased their use of medication. Under the direction of its 11-member board of directors application was made in 2014 to the Health Resources Services Administration for Lee Community Healthcare, Inc. to become a Federally Qualified Health Center Look-Alike, with final approval received on Feb. 27, 2015.

2014-15 marked the fifth year that Lee Community Healthcare received a \$1.5 million Low Income Pool Grant from the state of Florida for the fiscal year of July 1, 2014 – June 30, 2015. This amount has remained unchanged for the duration of the grant. Of the \$1.5 million in total funds received, Lee Memorial Health System provided a match of more than \$400,000, which meant \$1 million in “outside/new” grant dollars came to the system each year.

Patient Centered Medical Home

A Patient Centered Medical Home is not a place, but rather a model for care delivery that creates a partnership between you, your primary care physician and your health care team. The primary care physician's office serves as the medical home—the hub—for all of your health care needs. This initiative started with Lee Community Healthcare to help at-risk patients play an active role in managing their health. The model was so successful, with documented decreases in chronic illnesses, it was duplicated in all Lee Physician Group primary care offices.

An innovative approach to care, the Patient Centered Medical Home uses evidence-based guidelines and technology—such as the electronic health record—to work with you to coordinate your care and focus on keeping you well. The goal of a Patient Centered Medical Home is to shift the focus of health care from treatment to prevention.

Lee Physician Group offices earned the recognition of being Patient Centered Medical Homes from the National Committee for Quality Assurance. This national program recognizes primary care practices that demonstrate the highest levels of coordinated and effective patient care, which helps provide reassurance that you are receiving the highest quality care. Earning this recognition requires that we meet the criteria of nine standard categories, including:

- Access and communication
- Patient tracking and registry functions
- Care management
- Patient self-management and support
- Electronic prescribing
- Test tracking
- Referral tracking
- Performance reporting and improvement
- Advanced electronic communication

The program covers children from ages 1-18 throughout the state.

Florida KidCare

For families struggling to get affordable health care for their children, KidCare is an easy option. The program offers health services to families who do not have health insurance.

"We usually get families involved when they come to the emergency department or through our outreach efforts," says Kim Samuelson, KidCare supervisor for the Golisano Children's Hospital of Southwest Florida. The program is available to families in all income brackets as long as they do not currently have insurance. The program covers children from ages 1-18 throughout the state. Kim works with families to determine their monthly cost for the program, based on their income and family size. The total number enrolled in 2014 was 3,366. All American citizens, as well as documented residents of other countries, may apply for the program.

"The goal of the program is to keep children healthy," Kim says. "We want parents to seek medical help through regular checkups and through their family physician, instead of waiting until an illness escalates and then they end up in the emergency department. It helps keep children well, and when they are ill, helps them improve more quickly."

The program employs a staff of eight application assistance specialists, who are available to help families throughout Lee County with Medicaid or Florida KidCare. Our program was ranked best in the state of Florida and Kim has earned the "Florida KidCare Trendsetter Award."

Lee Memorial Health System Foundation

Lee Memorial Health System Foundation raises funds to support lifesaving programs for children and adults at Cape Coral Hospital, Golisano Children's Hospital of Southwest Florida, Gulf Coast Medical Center, HealthPark Medical Center, Lee Memorial Hospital, Regional Cancer Center and the Rehabilitation Hospital.

In 2014, The Foundation raised \$13.8 million for Lee Memorial Health System and saw the total raised to build the new Golisano Children's Hospital of Southwest Florida reach \$82 million since inception of the capital campaign supporting the project. Ground breaking for the project took place in April 2014, with expected completion scheduled for spring 2017.

During the fiscal year, Lee Memorial Health System Foundation distributed a total of \$7.1 million to Lee Memorial Health System departments to support a myriad of services, including community health clinics, neonatal care, autism screening, graduate medical education, care coordination for at-risk mothers and infants,

palliative care, pediatric cancer treatment, diabetes education, adult cancer services, cystic fibrosis screening, caregiver support, counseling, educational scholarships, breast cancer navigation, music therapy, child advocacy, pediatric cardiology and more.

Please visit www.LeeMemorial.org/Foundation, email Foundation@LeeMemorial.org or call 239-343-6053 to learn how you can support lifesaving and life-changing care at Lee Memorial Health System.

The new Golisano Children's Hospital of Southwest Florida is scheduled to open in 2017. The hospital will offer the most advanced technology in pediatric care available between Tampa and Miami.
